

Over 230 patients treated successfully with ClotStop®

CATHETER FOR CHEST DRAINAGE

55% observed less blood clots within the catheters after drain removal

64% see a reduced need for milking

67% can imagine using smaller drains

13 surgeons reporting

All testing surgeons agree that **ClotStop® drains are safe**

Dr. Thomas Martens
Deputy Head of Department
of Cardiac Surgery at UZ Gent

“ClotStop® catheters are superior in the prevention of catheter occlusion in comparison to PVC drains.”

Professor Mahmoud Loubani
MBBCh, Dip Hlth Mgt, MMedEd, MD, FRCS, FRCSI, FRCS (Cth), FETCS, FAcadMed, FFSTEd, SFHEA, Consultant Cardiothoracic Surgeon/Honorary Professor of Cardiothoracic Surgery at Department of Cardiothoracic Surgery at Hull University Teaching Hospitals NHS Trust

“In our institution **approximately 5%** of patients need to be re-opened for bleeding after cardiac surgery. [...] One of the problems we observe is catheter clotting [...]. [With ClotStop®], we observed **no clots during the therapy or after the drain removal. None** of the patients **needed re-operation for tamponade**. Moreover, we **saved time** with this new catheter since clearance of the catheter through **milking** which is usually performed on a regular basis in our institution, **was not necessary.**”

92% recommend the use of ClotStop®
